Forage Crops

EXCEED^{SAR} for Soybeans

Plant Defense Booster

- An increase of 3.8 bushels over the non-inoculated control was demonstrated in replicated Midwest trial locations.
- By disrupting the life cycle of the J1 and J2 soybean cyst nematode, Exceed^{SAR} can alter the effect the nematode has on young soybean plants.

Package size: 2x250 and 4x50

EXCEED[®] Traditional Liquid for Soybeans

Superior Legume Inoculant

Package size: 1x200 and 4x50

EXCEED[®] Granulated Peat for Soybeans

Package size: 40 lb bag and 520 lb tote

EXCEED[®] STIC for Soybeans

Superior Legume Inoculant

Package size: 1500# and 300# Treat size

EXCEED[®] Peat for Soybeans

Superior Legume Inoculant

Package size: 1500# and 300# Treat size

EXCEED^{SAR} for Garbanzo Beans

Plant Defense Booster

- By disrupting the life cycle of the nematode, Exceed^{SAR} can alter the effect the nematode has on young garbanzo bean plants.
- The Exceed^{SAR} mode of action enables the seed to germinate quickly and stimulates plant hormones responsible for root formation and development.

Package size: 1x200

EXCEED[®] Traditional Liquid for Peas & Lentils

Superior Legume Inoculant

Package size: 1x200 and 4x50

EXCEED[®] Granulated Peat for Pulse Crops
