

# Pollinator Wildflower Mix

Star Seed's Pollinator Wildflower Mixture is a diverse seed mix that will attract and feed pollinators all season long as well as increase the aesthetics of any area it grows. Pollinator Wildflower Mix will enhance areas small and large around commercial sites, schools, parks, homes and playgrounds.

This mixture offers season-long blooms of reds, purples, blues and reds. A portion of the mixture is comprised of annual flowers that if allowed to establish seedheads, will re-seed themselves for several years.

- |                             |                                      |
|-----------------------------|--------------------------------------|
| Purple Coneflower           | California Poppy                     |
| Lanceleaf Coreopsis         | Calendula                            |
| Perennial Lupine            | Black-Eyed Susan                     |
| Dwarf Blue Bachelor Buttons | Gayfeather                           |
| Partridge Pea               | Plains Coreopsis                     |
| Rocket Larkspur             | Butterfly Milkweed                   |
| Indian Blanket              | Sweet Alyssum                        |
| Blue Wild Indigo            | Smooth Blue Aster                    |
| Sulphur Cosmos              | Corn Poppy 'Mixed Colors'            |
| Lemon Mint                  | Species may vary due to availability |

## PLANTING TIPS

- ◆ Drill seed 1/4 to 1/2 inch deep
- ◆ If broadcast seeding, incorporate into soil at 1/4 to 1/2 deep
- ◆ If feasible and economical, irrigate for faster establishment
- ◆ Spring planting is optimal or frost/dormant seeding will help to naturally break dormancy of many species
- ◆ For weed control, mowing down to 5 inches is best for the first two years
- ◆ Full establishment will take 2-3 years
